

The background features abstract, overlapping green geometric shapes in various shades of lime and forest green, creating a modern, dynamic feel. The shapes are primarily located on the left and right sides of the frame, with some extending towards the center.

Autonomous Solar Kit

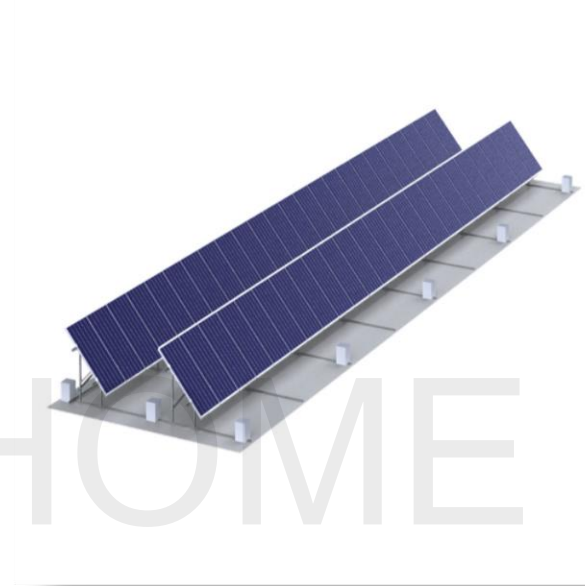

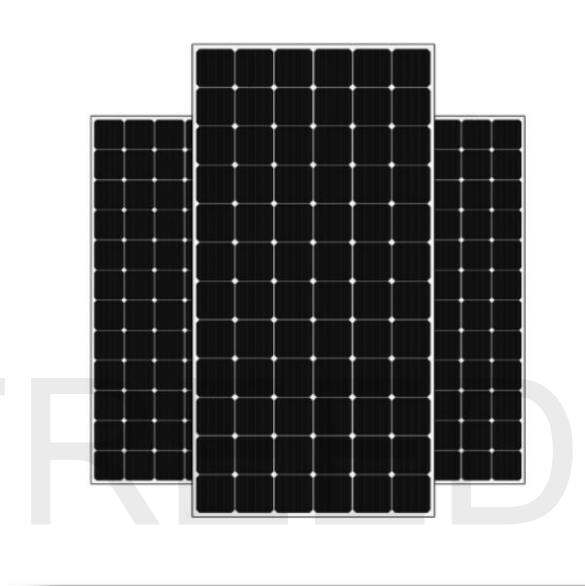

Electricity Everywhere!

Autonomous Solar Kit 7 kW

- Become self-sufficient in electricity!

This solar kit is designed for a daily consumption of 28 kWh. Supplied with 28 solar panels (roof/ground mounting included), 250 w, 25-year warranty, 1 MPPT controller that can be connected to the generator to charge the batteries on cloudy days, 1 inverter, 16 x 180 AH batteries, 6 pairs of connectors and 100 meters of cable.

Specifications

- ▶ **Solar panel:** 28, polycrystalline, 280 W
- ▶ **Contrôleur:** PV 96V 60A
- ▶ **Inverter:** 8 KW Off Grid Inverter with MPPT Controller
- ▶ **Batteries:** 16 solar batteries 12V / 180 AH with cables
- ▶ **Support:** Roof/ground mounting bracket for 28 solar panels
- ▶ **Cable:** 100 meters of BV-1 x 6 international standard cable Series
- ▶ **Connector:** 6 Terminal connectors for connecting panels in parallel
- ▶ **Accessories:** Mounting accessories included
- ▶ **Warranty:** 25 years for panels, 5 years for controller, inverter and batteries
